PROFILE

Frontend developer with 5+ years of experience delivering web applications across startups and enterprise environments. Comfortable leading projects end-to-end — from architecture decisions to cross-team collaboration and delivery. My background in graphic design sharpens my attention to usability and visual consistency, which I consider a genuine differentiator when working on product-facing interfaces. I thrive in async, distributed teams and adapt quickly to new challenges.

EXPERIENCE

Accenture, Argentina — *Frontend Developer → Cloud & Infrastructure Lead* | January 2025 – Present

Stack: TypeScript · React · Node.js · PostgreSQL · Terraform · Docker

Frontend Developer | Jan – Jun 2025

- Implemented UI solutions for the finance team and built the team's internal component library, accelerating delivery cycles while aligning with Figma design prototypes.

Cloud & Infrastructure Lead | Jul 2025 – Present

- Leading backend application development and database integrations. Driving infrastructure deployments using Terraform, Docker, and CI/CD pipelines.

Troupper LLC, Miami — *Frontend Developer* | March 2024 – December 2024

Stack: React · Node.js · MySQL · Laravel

- Led the full frontend refactor of the main product's backoffice, introducing a scalable and maintainable component architecture aligned with the existing REST API.
- Reduced codebase complexity by consolidating redundant patterns, improving long-term maintainability and team onboarding speed.

Coderhouse — *Backend Programming – Mentor* | December 2022 – Present

- Part-time role supporting students through the backend course — reviewing projects, giving feedback, and guiding them toward final submissions.

Aenima, Santa Fe — *Technical Lead and Fullstack Developer* | September 2021 – February 2024

Stack: TypeScript · React · Node.js · WordPress · Docker

IT Technical Lead | August 2022 – February 2024

- Led the development team, improving cross-area communication and work processes. Drove team efficiency and introduced infrastructure improvements to support new technologies.

Full Stack Developer | September 2021

- Built WordPress and React applications for local and international clients. Maintained and updated PHP-based CMSs, resolving deprecated dependencies and security vulnerabilities.

Freelance — *Web Development* | January 2021 – Present

- Development and maintenance of SPAs and WordPress websites.
- Independent projects to explore new technologies and stay current with web development trends.

EDUCATION

Universidad del Aconcagua — *Lic. Informática y Desarrollo de Software* | 2018 – 2021

Universidad Nacional de Cuyo — *Lic. Diseño Gráfico* | 2016 – 2017
